AREAS OF EXPERTISE

- HTML
- CSS
- Javascript
- Nodejs

PROJECT HISTORY

RESPONSIVE AND INTERACTIVE FRONT END WEB APPLICATION

Fitness and Food

This application allows users to sign up and create an account which allows users to search for meal ideas and exercises to help them with their fitness goals.

Technologies used
- HTML, CSS, Javascript, Foundation framework, Jquery.
-The spoonacular and wger APIs.

Deployed URL: https://alexgroat.github.io/food-fitness/

SERVER SIDE API

Weather Dashboard

Using the Open Weather One Call API I have created a website that allows the user to search a city and then be shown both the current weather and a 5-day forecast.

Technologies Used
-HTML, JavaScript, jQuery and CSS
-CSS Framework - Bootstrap and Font Awesome
-Open weather API

Deployed URL:https://alexgroat.github.io/weather-dashboard/

Javascript Functionality

Code Quiz

Allows the user to test their knowledge about coding and collects the user input and display it in a high scores page. It also punishes the user for a wrong answer by subtracting from the score and time.

Technologies used
- HTML, JavaScript, jQuery and CSS

Deployed URL: https://alexgroat.github.io/code-quiz/
